

**CONTRACT TO BE LET
BY U. S. FOR WORK
ON CALOOSAUQUEE**

District Engineer Frazier

Being Made

Effect Will Be To Make

Discharging Water

The first important action for the prevention of overflow of Lake Okechobee next fall has been taken by the War Department, important because it provides for enlargement for the disposal of flood waters.

Arrangements were being made at Jacksonville yesterday to award

The bid of the DesRochers-Watkins Towing Company of Miami, the low bidder, was \$100,000 for excavation of the Caloosahatchee river between Fort Thompson and the upper end of Lake Hopewee which when completed will provide a minimum channel between Lake Okeechobee and Fort Myers 50 feet wide with 4 feet of navigable water at low river stage.

The bid of the DesRochers-Watkins Towing Company was 14 cents per cubic yard.

Bids for excavation of the Caloosahatchee river were received at the U. S. Army War Department's office in Jacksonville on Jan. 24, April 3, and

Lieutenant Colonel L. V. Frazier, district engineer, in a telegram to The Everglades News yesterday said that the name as to the name of the low bidder.

Captain F. Deane Duff of Clewiston, a member of Okeechobee flood control district board, procured the bid from W. W. McClure, the War Department engineer on flood control plans survey, the information as to the effect of the federal government work on flood control river project.

The federal government work on the Caloosahatchee river on which bids were received in Jacksonville April 3 involves excavation of 50,000 cubic yards of sand from the channel between Fort Thompson and the upper end of Lake Hitchcock. Connection between Lake Hitchcock and Lake Okeechobee will be made by Everglades drainage district canal.

ICE CONSUMPTION BREAKS RECORDS

The Florida Power & Light Company's ice business in March was the heaviest in any month since the company entered this territory. H. L. Lapp, resident manager, reports. By a comparative standard the company's ice business was better in March in the upper Glades than in any other district.

Heavy consumption of ice was due to its use in refrigerator cars loaded with vegetables. The Brown Company at Shawano on Hillsboro canal was the largest individual user. Deckman Farms at

Lake Harbor used more car-loading in March than was used at that station in any other month this season.

DROWNED IN LAKE

A man named Newton was drowned this week while bathing in the Lake. He worked for the sugar company and lived on the ridge north of Canal Point. His had not been here long. Mr. Berry of the Everglades Funeral Home took charge of the body.

SEEK ANOTHER PLACE FOR POST OFFICE

Better Service When Office Is Returned From Company Commissary

Changes are in prospect that soon will result in the Canal Point post office being moved to another part of town and the doing away with the sugar company's "Azucar" private post office and its consolidation with the Canal Point office. The sugar mill post office is in the sugar company commissary, less than three miles from Canal Point.

The Azucar post office was established in the sugar company's commissary while C. C. Coleman was postmaster at Canal Point, when Coleman resided in the commissary. The new office in order to turn business away from Coleman, Coleman was removed and put under arrest for misappropriation of postal funds. Since Coleman was removed from the business at his office, Coleman was relieved of necessity of having a clerk who would know of his diversion of postal funds. The same process resulted in the establishment of a post office at Port Mayaca, eight miles away, and the loss of the Mayaca business to Canal Point.

On Coleman's removal, W. A. Baker was appointed. The new postmaster put on two clerks, one clerks and had made the postal service as good as it can be in the building that is not used in the office. This building is far too small, however, and the postmaster and his clerks and his public are discommoded by the lack of adequate space.

It is suggested that the sugar company post office be not reduced the amount of work required to be done at the Canal Point post office, for many of the employees of the company get mail at both offices. Such benefits as have resulted from the establishment of a post office at sugar company commissary was a bit of "window dressing" to make the company operations seem important at the time of the stock selling campaign. Failure of the company appointment of a postmaster and inability to sell any more stock has lessened the need of using the post office department as an aid in company promotion.

Suggestion that the Canal Point post office be moved to the Bank of Canal Point building and quarters shared with the bank is not acceptable to public sentiment because, for one reason, it appears as an attempt of the sugar company to use the postal service attaches to use the postal service for their private ends. The building is too small for a bank and a post office, even if the bank is to be no more than a liquidating agency to relieve the stockholders of having to pay assessments for the benefit of depositors.

A building on the west side of the canal is now available for occupancy, having been vacated by the Weingard grocery stock, and the transfer of the post office to that location is practicable and is acceptable to a majority of the patrons of the office.

CANAL POINT M. E. CHURCH
Our aim is to make every service special, and cordially invite all to come and worship with us. Our Sunday school has an average of 100 per cent mark in attendance; that is, leaving all full member enrolled present, including visitors.

Text for 11 a. m. service will be found in Issue 1311 service.

Text for the evening service, James 4-7-8. Our evening service will begin at 8 o'clock.

Sunday school 9:45 a. m.
The Ladies Aid will meet at the home of Mrs. J. H. Santos Tuesday, April 14 for an all day meeting, at which time a covered dish dinner will be served. All are urged to be present as this will be the last meeting before conference, after which the new officers recently elected will be installed.

R. E. STARS, Pastor.

SCHOOL NEWS

SOCIAL NOTES

Marjorie Cochran and Hazel Ellett were visitors in West Palm Beach Saturday.

Uteba Jones has been absent from school in the past week because of illness.

Miss Sharp spent the week end in Tampa visiting relatives.

Mr. Bishop and Mr. Chatter attended Easter services in West Palm Beach Sunday.

Venice Swango has been absent from school several days this week.

Mrs. Fenwick spent Easter in Fort Lauderdale.

Buddy Cochran and Louis Williams and Elsie Davis spent Tuesday in West Palm Beach.

Rev. John Sims talked to the boys physical education class Tuesday. He will talk at the union assembly period Friday for all the high school.

Plans are being made for the Junior-Senior banquet.

Prof. H. L. Spier will attend the Legion conference in Tampa this week end.

Dr. L. W. Armstrong gave a talk on "Care of the Teeth" in chapel last Friday.

SCIENCE LABORATORY
"Initiation is the science of fact," at least the science students have found it so in quite a few specimens we have prepared.

Recently we have secured live specimens of the deadly coral snake, and its harmless imitator, the garter snake. The coral snake is entirely new route of travel to the hitherto unreached part of the lake system.

The garter snake has been found in the Gulf states is the most deadly snake of North America. It is very strikingly colored with red, yellow and black. This is an example of warning coloration.

Another snake has been found, the scarlet, yellow and black. This is an example of warning coloration.

The scarlet snake mimics the harmless garter snake, and it is hardly distinguishable from the harmless garter snake.

The single genus Elaps of the new world contains about 28 species of coral snakes. Two of these are found in the United States—the hatteria or coral snake and the hatteria or coral snake.

The hatteria or coral snake is a very dangerous snake, and it is very difficult to handle. It is very dangerous to handle, and it is very difficult to handle.

The hatteria or coral snake is a very dangerous snake, and it is very difficult to handle. It is very dangerous to handle, and it is very difficult to handle.

PROGRESS ON ROAD ON N. W. LAKESIDE

Grade To Be Done In April. Hard Surfing To Be Finished In July.

Glades County Democrat.

Work on the 3.2 mile stretch of state road 29 from Indian Prairie canal to Kissimmee river is rapidly progressing. It is estimated by G. L. Bogan, state supervisor in charge of this section, that all grading on this unit will be completed within the month, and top dressing will be finished by July.

F. A. McKenzie of Lakeland is contractor for the work. The road was authorized by an act of the legislature which created the road as an emergency measure for that portion of the lake shore as there was no means of egress in case of storm. The road as built now is not complete, but is designed to be connected later with a road north at the Kissimmee river. The State Road Department has requested the war department to grant a permit to erect a bridge over the Kissimmee river at the point where the road ends. This would have an important link in the state highway system, giving an entirely new route of travel to the hitherto unreached part of the lake system.

The road will have an elevation of 25 feet above sea level. The bridge will be 15 feet long and will be constructed of concrete. The bridge will be constructed of concrete.

TOPNOTCHERS

by KET

CANAL POINT

Mr. and Mrs. Arthur Wells of South Bay district, "Boca Ciega" were in Canal Point yesterday on a shopping trip. Mr. Wells has transacted business at the Bank of Pabokee and at the bank, Mr. White and Jack Baker, West Palm Beach lawyers, were called in Canal Point Wednesday.

There was a heavy rain the first of the week but there is no complaint among truckers that the ground is too wet. In the north part of the district, where the sugar company has pulled the water down, the rain was welcomed.

R. M. Baker this week assisted in Denton's store at South Bay where a sale is under way.

Fish is being served regularly at Pabokee's restaurant.

COFFEE "take-me-up" is the newest and smartest note in Denton's store at South Bay where a sale is under way.

Fish is being served regularly at Pabokee's restaurant.

TO FREEZE DEPOSITS
Ernest Amos, state commissioner will apply to the circuit court April 18 for an order compelling the bank to freeze deposits in the Bank of Canal Point and allow the bank to re-open instead of "letting the liquidator to get the bank's assets for the benefit of the stockholders of having to pay money which they say they have deposited."

WOMAN'S CLUB
The Canal Point Woman's Club met Tuesday, April 7 with Mrs. W. G. Todd, hostess. An election of a president for the coming year was held. Mrs. George was elected president. Plans were made for a class work and any girl who wanted to join the Girl Scouts, the present class meeting in Pabokee next Tuesday, April 14.

The next hostess for the club will be Mrs. W. H. Vann and each member is requested to bring a prospective member. After a committee of the business section, Mrs. Todd served delicious lemonade, cake and sandwiches to the following: Mrs. James G. Gibbs, Spier, Sims, George, Gibbons, Hamrick, Mahard, Tucker, Pope.

PUBLIC AFFAIRS
By Howard Sharp.

H. J. Quincey, an attorney of West Palm Beach, writes me as follows:

I agree with you that \$100.00 a year salary for each of our five county commissioners is exorbitant, ridiculous and unnecessary. I agree also to the idea contained in your article that it is improper, unnecessary and inadvisable for the county commissioners to make a personal raid upon the treasury on the idea that they are giving personal attention to the road and bridge work of the county. It is the opinion of the entire board, it should be deemed necessary that some particular commissioner should receive a particular road or a particular bridge, or any other county enterprise, that a resolution to that effect should be introduced and passed by the board assembled, and the resolution should provide what compensation the commissioner should receive for the services to be rendered. The law provides when the board assembled, and the resolution should provide what compensation the commissioner should receive for the services to be rendered. The law provides when the board assembled, and the resolution should provide what compensation the commissioner should receive for the services to be rendered.

Hints for Homemakers

By Jane Rogers

COMMUNITY GOSSIP

Jack Hanlin has an appreciation of the eternal fitness of things; he carries a well-worn walking stick.

White Smiley was taking a nap in a rocking chair. Pat Carroll heard a snoring picture of him. Pat Carroll knew that he too has been snoring in the same picture.

The study of Latin helps her to a good deal in her English literature. Mary Baker says, "Now, knowing something of Latin," says Mary, "I understand the significance of it when a preacher or a lecturer quotes from the classics and says, 'Sic semper tyrannis' a plumbum unum Er go laugh by golly!" And saying which Mary looked at the two buffalo nickles the handshaver had put out on the table to pay for a cup of coffee, one nickel showing head and the other tail; that is, one showing the Indian head and the other the buffalo. "They put the Indian sign on the nickel and then lulled it," Mary said.

There are men of the past largest graft who are "ignorant to police officers as 'shut-writers'—men who solicit subversion."

Wet Land On Islands Limits Production
Farmers on islands in Lake Okechobee being unable to make their usual crops on account of the high level of the lake, lack of production from the islands was the chief factor in limiting the shipment of beans in March from the Lake region.

In the first week of April of 1927, the number of cars of beans rolled from the stations of the Florida East coast railroad was 62, and in the same period in 1929 the number of cars of beans rolled was 104, in addition to a car of other vegetables.

In 1928 and 1929, when fruit had killed beans on the mainland, shipments were held up to 26 cars and 11 cars by the production from Kraemer and Torry islands. If the effect of lake levee construction is to hold Lake Okechobee at a high level and prevent use of island lands, there will be greater need than ever before for the growing of frost-resistant vegetables on the mainland to keep up a regular movement and provide employment and make business for the retail stores.
